**Al Forat Channel** is a private Iraqi TV channel broadcasting general affairs and entertainment throughout the Persian Gulf.

Al Forat Channel has studios in Iraq & Lebanon

This project included transforming a warehouse into a TV production studio. The challenge was to conclude the project within a short time. The design and execution of the project included every tiny detail in a studio.

Lighting grids, floor treatment, chroma key area, cable trays, stage power distribution, air conditioning, power generator, UPS, earthing, and control tables in addition to the design, installation and testing of the video and audio equipment.
