About Al Mayadeen

Al Mayadeen is a new private International TV channel broadcasting News and Political Programs from Lebanon.

Al Mayadeen was born in 2012 and becomes one of the most important news channels in the Middle East

This project includes designing and implementation of three mobile SNGs.

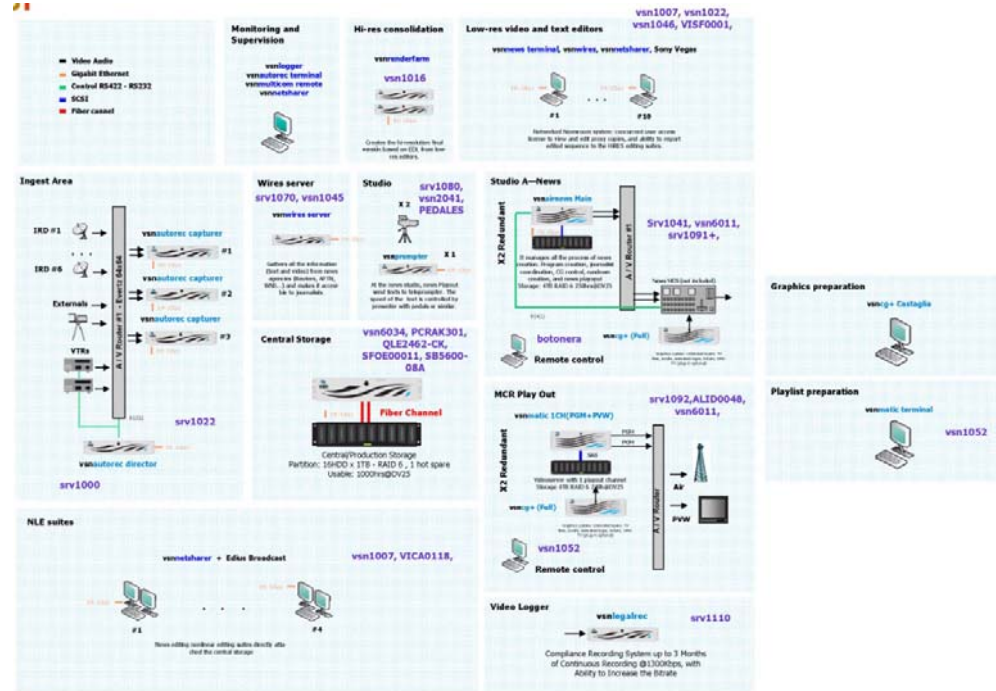

Our work covered converting the ordinary 4x4 vehicles into an equipped SNG with all necessary work including coach building, power distribution, interior design and equipment installation.

قناة الميادين

- § 2 news play out systems for two studios
- § 30 journalist w/s
- § VSN CG and promoter
- § 4 Edit stations
- § Play out system

About al Mayadeen

Al Mayadeen is a new private International TV channel broadcasting News and Political Programs from Lebanon.

Al Mayadeen was born in 2012 and becomes one of the most important news channels in the Middle East

This project started as a very small one, only 10 journalists and play out in one studio, originally created for Al-Itihad channel; however, after merging with al-Mayadeen Channel, the news system had to be expanded to meet the expectations of al-Mayadeen Channel.

The final version of the news system ended up to be a complete redundant system from ingest to play out, controlled by the new Spider system from VSN.
